

A Friend: "What up, Doc?"

The Wise Man: "The terrible winter is gone finally. For sure, the Earth is getting more hostile! I have a new idea."

F: "What's it!?"

W: "You know, science & technology has advanced so much & so fast, so that, for the very rich, life expectancy is high, and is getting higher at an exponential rate, thanks to AI, DNA editing tech, ..."

F: "So what? I'm poor, and mine is short presumably. Could you get to the point?"

W: "So, some old rich people, since they can afford very good and expensive medical care, they could still alive by 2050."

F: "None of my business!"

W: "According to UN etc., due to Global Warming and population, the earth wouldn't be livable by 2050. Life then would be very, very tough. Death would be more preferable than trying to live."

F: "So!"

W: "If we now start a club of 'Get very Rich and really healthy; alive by 2050; die at the same time in 2050', with member fee, we could be rich."

F: "Why die at the same time?"

W: "For sake of fraternity love! Do you want to join me to start the club?"

F: I'm not wise enough!"
